BIOMETRIKA

A JOURNAL FOR THE STATISTICAL STUDY OF BIOLOGICAL PROBLEMS

FOUNDED BY

W. F. R. WELDON, FRANCIS GALTON AND KARL PEARSON

EDITED BY

KARL PEARSON

ASSISTED BY

EGON SHARPE PEARSON

VOLUME XVII

1925

ISSUED BY THE BIOMETRIC LABORATORY
UNIVERSITY COLLEGE, LONDON
AND PRINTED AT THE
UNIVERSITY PRESS, CAMBRIDGE

PRINTED IN GREAT BRITAIN

Gen(Sci. Ref)
Japan

CONTENTS OF VOLUME XVII

Memoirs

		PAGE
I.	A Study of Egyptian Craniology from Prehistoric to Roman Times. By G. M. MORANT	1
	Note. The Definition of the Alveolar Point. By KARL PEARSON	53
II.	On the Moments of the Hypergeometrical Series. By Professor V. ROMANOVSKY	57
III.	Probability Integrals for a Hypergeometrical Series. By Professor BURTON H. CAMP	61
IV.	Determination of $\int_0^\theta \cos^{n+1}\theta\, d\theta$ for Large Values of n, and its Application to the Probability Integral of Symmetrical Frequency Curves. By JOHN WISHART	68
V.	On the Moments of the Distribution of Squared Standard Deviations for Samples of N drawn from an Indefinitely Large Population. By A. E. R. CHURCH	79
VI.	The Corpuscle Problem. A Mathematical Study of a Biometric Problem. By S. D. WICKSELL	84
VII.	The Further Theory of Francis Galton's Individual Difference Problem. By J. O. IRWIN	100
VIII.	On the Multiple Correlation of Brothers, being a Note on Mr J. O. Irwin's Memoir, and on my Statement of the Application of Galton's Difference Problem to the Determination of the Degree of Relationship of Brothers, made in August 1902. By KARL PEARSON	129
IX.	Heights and Weights of Patients in Mental Hospitals. By ROSA GREENWOOD, CECILY M. THOMPSON, and HILDA M. WOODS	142
X.	Further Contributions to the Theory of Small Samples. By KARL PEARSON	176
XI.	James Bernoulli's Theorem. By KARL PEARSON	201
XII.	On the Means, Standard Deviations, Correlations and Frequency Distributions of Functions of Variates. By Professor KAZUTARO YASUKAWA	211
XIII.	On a Criterion for the Rejection of Outlying Observations. By J. O. IRWIN	238
XIV.	Notes on an Experimental Test of Errors in Partial Correlation Coefficients, derived from Fourfold and Biserial Total Coefficients. By ETHEL M. NEWBOLD	251
	Note on Miss Newbold's Memoir. By the EDITOR	266

PAGE

XV. The Fifteen Constant Bivariate Frequency Surface. By KARL PEARSON 268

XVI. On a Skew Correlation Surface. By E. C. RHODES 314

XVII. On the Excess Mortality of Males in the First Year of Life. By Major GREENWOOD and ETHEL M. NEWBOLD 327

XVIII. Table of the First Twenty Tetrachoric Functions to Seven Decimal Places. By ALICE LEE 343

XIX. Modern Problems in Vital Statistics. By Professor HARALD WESTERGAARD 355

XX. On the Extreme Individuals and the Range of Samples taken from a Normal Population. By L. H. C. TIPPETT 364

XXI. Bayes' Theorem, examined in the Light of Experimental Sampling. By EGON S. PEARSON 388

XXII. Mutually Consistent Multiple Regression Surfaces. By BURTON H. CAMP 443

Miscellanea

(i) Some further Notes on Cancer and Goitre Distributions. By PERCY STOCKS 159

(ii) Recurrence Formulae for the Moments of the Point Binomial. By RAGNAR FRISCH 165

(iii) Review: Newsholme's "The Elements of Vital Statistics in their bearing on Social and Public Health Problems." By E. M. E. . 171

(iv) Lebenserwartung und mittleres Alter der Lebenden. Von E. I. GUMBEL 173

(v) Table of the Differences of the Powers of Zero. Computed by K. P. and E. M. E. 200

(vi) On First Power Methods of Finding Correlation. By KARL PEARSON 459

(vii) Further Remarks on a Previous Paper entitled "Determination of $\int_0^\theta \cos^{n+1}\theta d\theta$ for large values of n." By JOHN WISHART . . 469

(viii) Contributions to the Theory of Small Samples drawn from a finite Population. By J. SPLAWA-NEYMAN 472

List of Plates, etc.

(α) "Biometrika" Portrait Series, No. I. Abraham de Moivre, Discoverer of the "Normal Curve" . . . . . *Frontispiece*

"Biometrika" Portrait Series, No. II. Rudolf Martin . . *to face page* 201

(β) Morant's Egyptian Craniology.
Folding Sheet of Measurements of Crania of First Dynasty . . . 52
Six Tissues of Cranial Contours, First Dynasty, in pocket at end of volume.

(γ) Pearson's Fifteen Constant Bivariate Frequency Surface.
Two Tissues of Barometric Height Contours in pocket at end of volume.
